

## IMPORT YOUR DATA

1. Run Genstat by double-clicking the desktop shortcut.

2. Select an example data set to work with. From the menu select **File | Open Example Data Sets**.

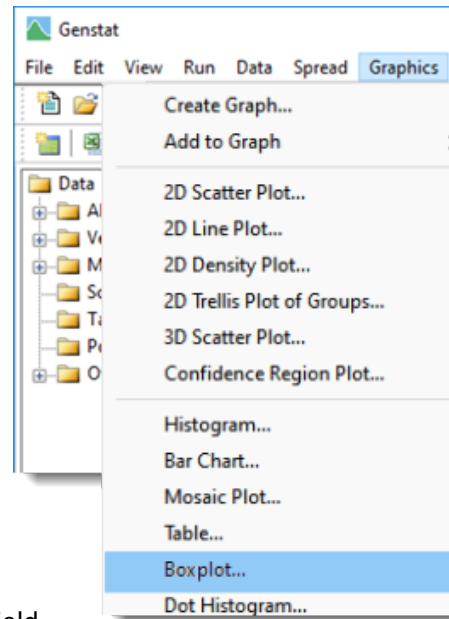

3. Type `sulphur.gsh` into the **Look for file** field then click **Open data** to display this spreadsheet.

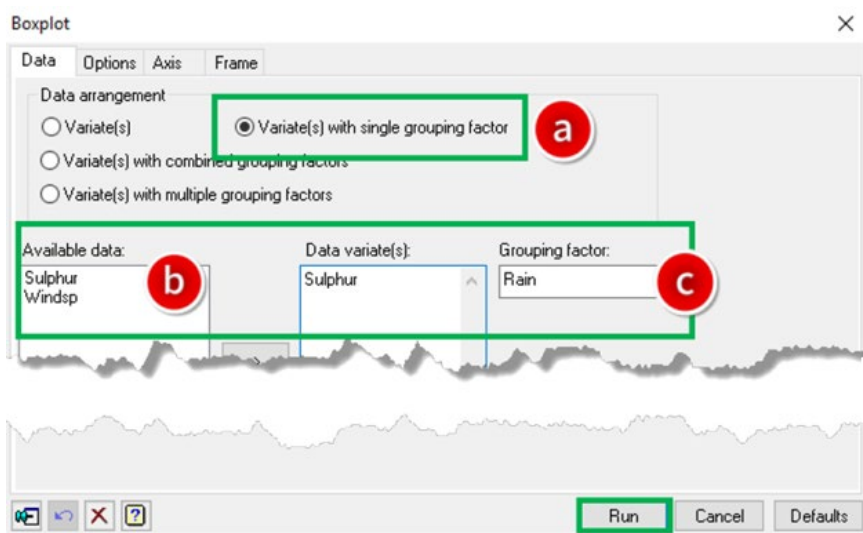

Row	Sulphur	Windsp	Winddir	Rain
1	0	14.8	W	no
2	13	14.3	N	no
3	12	5.5	W	no
4	22	5	NW	no
5	12	4.5	W	no
6	6	4.8	NE	no
7	2	4.3	E	no
8	24	4	SE	no
9	36	9.3	S	no
10	6	6.3	NE	no
11	10	5.8	SW	yes
12	4	8.3	W	yes
13	3	16	SW	yes
14	7	15.8	W	no
15	2	16	SW	yes
16	3	16.7	W	yes

## CREATE A GRAPH

1. From the menu select **Graphics | Boxplot**.

2. a) Select **Variate(s) with single grouping factor**.  
 b) Double-click Sulphur to move it to the **Data variate(s)** field.  
 c) Move the mouse cursor to **Grouping factor** and double-click Rain to use this as the group factor.

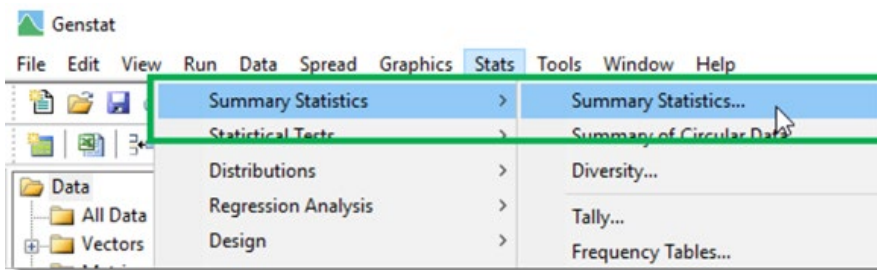

3. Click **Run** to open the Graphics Viewer, which will plot your graph.

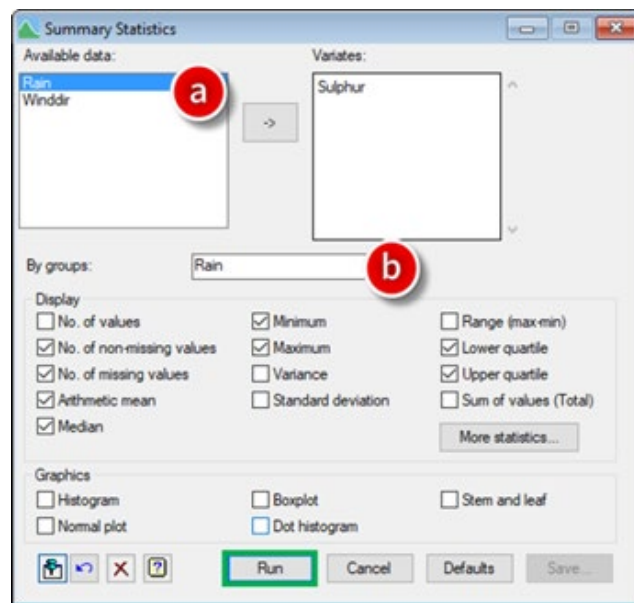

RUN A STATISTICAL ANALYSIS

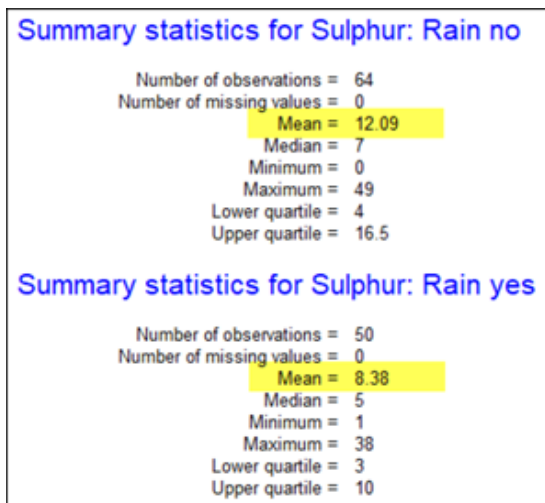

1. Compare two samples in `sulphur.gsh` – sulphur in the air on dry days and sulphur in the air on rainy days. From the menu select **Stats | Summary Statistics | Summary Statistics**.

2. a) Double-click `Sulphur` to move it to the **Variates** field.  
 b) Place the cursor in the **By Groups** field then double-click `Rain` to use this as the group factor.

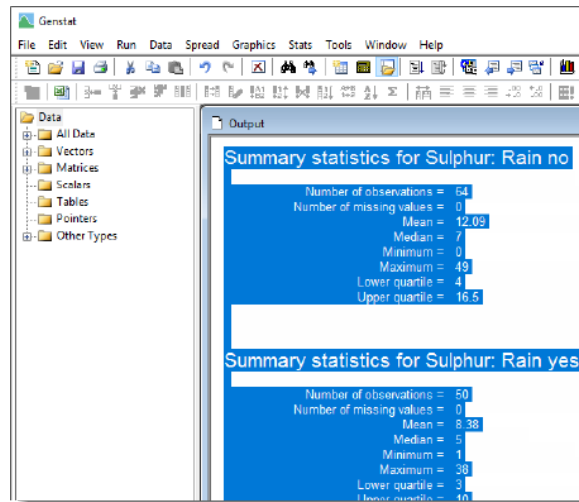

3. Click **Run** to display the results in the Output window.

This numerical summary indicates that there is a higher than average sulphur content in the air on dry days:  
**Rain no** Mean = 12.09  
 vs  
**Rain yes** Mean = 8.38

## SHARE YOUR RESULTS

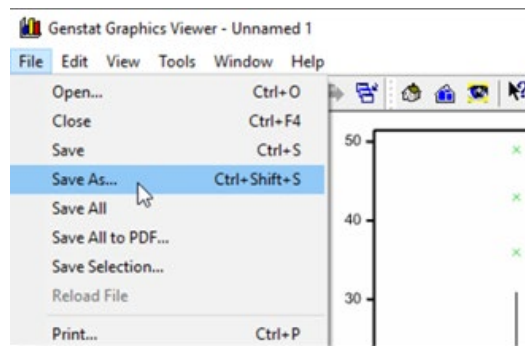

1. We'll save our Output window results and the boxplot into a Microsoft Word file so that we can share it with colleagues. Place your mouse cursor within the Output window text and drag the mouse to highlight the parts you want to copy – use the Windows shortcut keys **CTRL+C** to copy the highlighted text. Now open Microsoft Word and use the Windows shortcut keys **CTRL+V** to paste the summary results into your document.

2. Next we'll save the boxplot as an image file so we can insert it into Word. From the Genstat toolbar click  to re-display the Graphics Viewer.

3. From the Graphics Viewer, select **File | Save As...** then save the boxplot as a .png or file type of your choice. You can now insert this into your Word file.
